

eLineup Installation Instructions

Revised 6/30/2017

1. Click the [download link](#) provided in the email you received with your eLineup license key.
2. Microsoft Expression Encoder 4 must be installed before eLineup.
 - This component only needs to be installed the first time you install the eLineup application on a machine.
 - Microsoft Expression Encoder 4 is a free utility.
 - You **DO NOT** need to enter a license key for Microsoft Expression Encoder 4 SP2.

3. From the [eLineup.org download](#) page click on the Step 2: "eLineup" link to begin installation of the software.

Depending on your internet browser security settings you may see security warning messages during download and install of eLineup. These messages are just a warning, the eLineup software is safe to install on any compatible system.

4. Start the eLineup application using the icon created on your desktop. You will be prompted to activate the product by entering your license key. You can customize eLineup with your agencies name and image logo on this same settings screen.

Note: Activation is required for each user account that will use the eLineup software.

System Requirements

- Windows Vista/7/8/10
- Webcam to record witness (check [eLineup support](#) for compatibility)
- Intel Core i3/i5/i7 processor or equivalent recommended for best performance

Software Prerequisites

- [Microsoft Expression Encoder 4 SP2](#)
